# Profit Planning <br> The Six Keys to a Profitable Practice

* Raised in Middle Tennessee
* Father is Veterinarian
* Experienced benefits of principles about to share with you

## Objectives

* Investigate the main strategies of increasing profits in a veterinary practice.
* Develop a strategy to gain the most profits with the least effort. (i.e. working smarter not harder.)
* Make the strategy easy and simple enough to implement in your practice.

## Profit Planning

Methods are many,
Principles are few.
Methods always change,
Principles never do.

## Why are we in practice?

* To make money!
* If you are not in practice to make money, then what you have is a hobby!

## I am going to make a BOLD statement.

* "You are making exactly what you think you are worth!"
* Therefore; if you are not making the money you want, it is because you are not letting yourself do it!

## What is the solution????

* Change the way we think.
* Plan for profits.

# WECANNOTSOLVEOURPROBLEMS WITH THE SAMETHINKING WE USEDWHEN WE CREATED THEM 

- Albert Einstein

## Profits

* Do you have a specific profit amount you are trying to achieve this year?
* Do you have the profit goal written down?

## Question?

* How are you going to achieve something when you don't even know what it is???

## Profits

* Most owners focus on the wrong areas to improve profits. They focus on profits and not the elements that make up profits.

## Profit Formula

* Profits =

Sales

* -Cost of Goods Sold

## Cost of Goods Sold

* Aka Cost of Sales
*     - Variable expenses
* Drugs
* Medical supplies
* X ray expenses
* OTC purchases

* Anything directly involved in revenues.

## Profit Formula

* Profits =

Sales

*     - Cost of Goods Sold
*     - Overhead Expenses

## Overhead Expenses

* Aka Administrative Expense
* Fixed expenses
* Non Professional wages
* Professional (associate) wages
* Rent
* Interest
* Insurance
* Utilities
* Etc

## Profit Formula

* Profits =

Sales

*     - Cost of Goods Sold
*     - Overhead Expenses
*     - Owner's salary \& benefits

## Owner's salary

* Wages
* Benefits
* Life / Health insurance
* Perks
* Excess rent

## Profit Formula

* Profits =

Sales

*     - Cost of Goods Sold
*     - Overhead Expenses
*     - Owner's salary \& benefits
*     - Taxes

## Taxes

* Federal taxes on profits not payroll
* State taxes on profits not payroll

## Finally we have profits

* Profits =

## Sales

*     - Cost of Goods Sold
*     - Overhead Expenses
*     - Owner's \& associate's salary \& benefits
*     - Taxes
* Now can you see why I call it leftovers??? It is what is leftover after you pay all the bills!

## Making more profits

What can we do on the Revenue?:

* Increase sales by seeing more clients.
* Doing more procedures for each client.
* Increase prices so we make more for each procedure.

## Making more profits

What can we do on the EXPENSE side?:

* Decrease COGS (beating up vendors)
* Decrease Overhead (beating up employees)
* Decrease Owner's salary (default setting in a practice)
* Decrease Taxes

## Making choices

* So let's look at each strategy and determine:
* How efficient the strategy will work.
* How easy will it be to implement the strategy.

## Our Standard

* Using AAHA average hospital data
* (Using Small Animal Exclusive categories)
* Not about data but principle

## Strategy \#3 - Reducing COGS

* Cost of Goods Sold
* Aka "Beating up on vendors"
* These are your variable costs.

* They go up and down with sales.
* Reduce purchases of drugs, lab expenses, X ray and medical supplies

## Strategy \#4 - Reducing Expenses

* Overhead or Administrative expenses
* Aka "Beating up on employees"
* These are your fixed costs.

* They stay fairly fixed as sales go up and down.
* Reducing items like wages, CE, employee benefits, rent, insurance, etc.

## Strategy \#4 - Reducing Expenses

* The reason I call this "Beating up on employees" is because employee expenses are where Dr. Greedy saves money!

## Strategy \#5 - Reducing Owner's

## Salary

* By DEFAULT this is often what happens.
* If you don't have the money to pay your normal bills, it comes out of your pocket!
* Because you are compassionate to others, it costs your family.

## Strategy \#6 - Reducing Taxes

* Probably the most popular of the strategies.
* Owner's \& CPA's spend large amounts of time for usually short-term gains.
* Honesty is the best policy.

## Conclusions

The way to build profits is working on the elements of profits. Sales

- Cost of goods
- Overhead expenses
- Taxes

## Conclusions

To Improve profits work in this order

1. Increase pricing
2. Reduce overhead expenses
3. Increase sales (do more work)
4. Reduce Drug costs
5. Owner's salary
6. Taxes
