

TVMA is proud to announce a new member benefit. Through our working relationship with Innovative Financial Group, LLC, we have arranged a 10% discount on fee based financial consulting for all TVMA members.

This benefit is available to all TVMA members whether you have just started practicing or you have built a successful practice. As a new veterinarian, financial planning is extremely important as you manage your income and debt load. You will benefit from the intentional decisions you make with the help from the team at Innovative Financial Group.

As an experienced veterinarian, financial planning can provide you with answers to many questions. For a practice owner, what is your succession plan? What about your retirement lifestyle and strategy? What risks do you continue to face and how best to deal with them?

The team at Innovative Financial Group can help veterinarians at all stages of their careers. Through the use of technology, your plan will provide you with a personal financial website that will allow you to see exactly where you stand in relation to your goals and objectives.
